Rotary Cam Switch

We offer our client an excellent quality range of Rotary Cam Switch, which are manufactured from high grade quality raw materials. These Rotary Cam Sw..

An eminent company specializing in a wide variety of switches, catering to various industrial needs.....

Introduction

Electromechanical Switches are complex parts that enjoy high demand from a number of industries. We, **Bohmen Industries, established in the year 1977**, are an acclaimed **manufacturer and supplier of a wide variety of electromechanical limit switches and allied assemblies.**

Our manufactured switches are safe and extremely durable. We customize our products as per the needs and requirements of the clients. The switches are used in most major engineering industries that either rely on or help in process automation. With our hard core initiatives and efforts, we have been able to deliver the most comprehensive range of products to our clients.

We lay great emphasis on the quality of our products and we are fortunate to be backed by a sound infrastructure and a dedicated team of workers. All these factors have contributed significantly in the growth of our company over the years and today, we have a host of satisfied clients, with whom we look forward to build a long term relationship.

Our Product Range

We are renowned in industrial circles as a manufacturer of a wide range of switches, which includes:

- **General Purpose Limit Switches**
- **Position Switches**
- **Safety Switches**
- **Precision Switches**
- **Pull Cord Switches**
- **Weather Proof Switches**
- **Special Switches**
- **Roller Lever Switches**
- **Control Panel Accessories.**

Product Application

Our extended customer base is a symbol of the trust and reliability of our products. These are being used across various industries for different processes as a pilot control unit for any electronic / electromechanical system. Some of the areas where

our switches are used include:

- Material Handling Equipments
- Material Processing Machines
- Textile Processing Machines
- Rail Coach Safety Systems
- Lubrication Systems
- Packaging Machines
- Food Processing Equipments, etc.

Quality

Since the products manufactured by Bohmen Industries are used in various other industrial sectors, therefore, maintaining their quality is of prime importance. The switches are made by our team of engineers and skilled workers with great precision and care. The raw materials used such as polymers, ferrous and non ferrous metals and hardware, are procured from the most reliable industrial manufacturers. We have had the opportunity to interact with reputed material manufacturers such as Dupont India, SRF Ltd. amongst other companies for helping us to use the best materials and innovate on existing designs and norms.

The switches are tested as per laid down norms of relevant standards in our in-house test facilities as well as at reputed test labs under different conditions to ensure their proper functioning and safety.

We also customize the products as per the needs and specifications of the clients. Strenuous checking helps us to avoid any loopholes in production and aids in delivering the best products and services to our clients.

Infrastructure

Our production unit is equipped with machines like lathe machines, injection moulding machines, drilling and tapping machines to help the workers in the process.

There are automatic screw drivers, air compressors, etc. that help in automation and help in carrying out smooth production. We are fortunate to have a team of well experienced and skilled engineers, who work hard for the betterment of the company. Our research and development team is forever on its toes, engaged in product innovations to keep upbeat with the changing industry trends.
